

PANACHON KUMNUENGPANADON

FULLSTACK DEVELOPER

Chiangmai, Thailand | panachon.0131@gmail.com | <https://portfolio-jaryin.vercel.app/>

I am a Software Development student at ChiangMai Institute of Vocational Education (iven1) with a strong interest in web application development, particularly using Next.js and Angular. I have one year of experience working as an outsource developer, contributing to real-world projects and collaborating within development teams.

Recently, I have developed a growing interest in system design and system analysis. I aim to better understand software limitations, scope definition, and architectural boundaries in order to design scalable, efficient, and maintainable systems. I am passionate about continuously improving both my technical skills and my ability to think at a higher architectural level.

AREA OF SKILL

Typescript/Javascript	Frontend: Next.js, Angular, Vue.js	System Analysis
Database: SQL, NoSQL	Backend: NestJS, ASP.NET, Express	Responsive Design

KEY ACHIEVEMENTS

- **National Vocational Skills Competition in Network Technology.** National Vocational Skills Competition in Network Technology: Competed in a 7-hour practical challenge involving full-stack website development based on specified requirements, along with setting up and configuring a self-hosted server for deployment. Achieved 1st Place (Provincial Level), 2nd Place (Regional Level), and 11th Place (National Level).
- **Intelligence Weather Station.** – A weather checking website for Chiang Mai Technical College using the Meteorological Department's dataset and a Random Forest model to predict tomorrow's weather conditions.

EXPERIENCE

Softinter Chiangmai Co, Ltd, Outsource

May 2024 - Apr 2025

- Developed an ERP web application using Angular and ASP.NET
- Designed and generated reports using Jaspersoft
- Managed and monitored databases using DBeaver
- Collaborated with the development team to design and enhance the system in alignment with business requirements
